IMPORTANT EMAIL UPDATE

Dear RELA Members,

If you have not been receiving the notification emails or have been receiving the notification emails inconsistently, it may be due to your **network administrator's web browser** settings.

To resolve these issues, your IT team will need to ensure that they are configured using this document:http://support2.constantcontact.com/articles/FAQ/3126. To test that your IT teams have configured their systems properly, please feel free to have them work directly with our IT team (it@bermangrp.com). Our IT team can send them as many test emails as needed and on demand to help them calibrate their settings.

The messages that we are sending are using the widely used 3rd emailing party service Constant Contact. Once your team has calibrated the settings to match Constant Contact's guidelines, you should be receiving emails normally and as expected. If your company's settings are configured properly and you are still having trouble receiving emails, please notify us at it@bermangrp.com
